PERSONAL PROJECTS

Friends Cards App

- Developed a responsive Friends cards Application using React JS with React Class Components, used React Material UI for a consistent and visually appealing design that is responsive and mobile friendly.

Text Analyzer App

- Developed a responsive Text Utility Application using Functional components, React Hooks, and React bootstrap for designing.

Weather App

- Developed a responsive Weather Application using Functional components, React Hooks, bootstrap, Saas designing, and Axios for API data.

Todo App

- A simple to-do app for user to mark their daily work routine, In this I have added functionalities of add, delete, marked and update too.

Registration & Login App

- Developed a responsive Register & Login App using React Functional components, React Hooks and used local storage for storing user details. Added validation functionality too.

Ecommerce App

- Created a responsive Ecommerce app using HTML and CSS only, UI of this project is so attractive.
