## Objective

Highly motivated and enthusiastic fresher seeking an entry level position in front-end development and react Js developer.

Passionate and dedicated front-end developer with a strong foundation in modern web development technologies. I am a recent graduate with a solid understanding of HTML, CSS, and JavaScript, and I specialize in building interactive and user-friendly interfaces. My expertise lies in utilizing React, a popular JavaScript library, to create dynamic and efficient web applications

Where I can utilize my relevant skills to contribute to the success of the organization and further Develop my professional skills.

## Skills

- JavaScript
- React JS
- React-hooks
- React Material
- React HOC
- React router
- Bootstrap
- HTML5
- CSS3
- SASS
- React-redux
- TypeScript
- Design Pattern
- Next JS
- GraphQL
- Java
- MS sql server
- Postman
- Visual Studio Code
- IntelliJ
- Eclipse
- MySQL workbench
- firebase
- Mongo DB
- NoSql
- Windows
- sandbox
- Git & Github
- REST APIs

## Projects

### Friends cards App:

- Developed a responsive Friends cards Application using React JS with React Class Components , used React Material UI for a consistent and visually appealing design that is responsive and mobile friendly.
  - I used Axios in this project for retrieving data from APIs instead of fetch.
  - I used React Router DOM for handling navigation and rendering of different component based on the given URL.
  - This project is also built using Functional component, React Hooks, Context API, Redux.

### **Text utility App:**

- Developed a responsive Text Utility Application using Functional components, React Hooks, React bootstrap for designing.
- In this, I have added basic functionalities to convert your entered text into capital, lower case, copy text, reverse text, and clear text, and added a preview section too.
- Another section was added as a text summary for word counts, character counts (with and without spaces), and read time.
- Added dark mode functionality to it for a better user experience.

### **Weather App :**

- Developed a responsive Weather Application using Functional components, React Hooks, bootstrap, Saas designing, and Axios for API data.
- I used the open-weather API to get data on cities. When the user searches for any city, he or she will get temperature information for that city.

### **Todo app:**

- A simple to-do app for user to mark their daily work routine, In this I have added functionalities of add, delete, marked and update too.
- This project is built using functional components, React Hooks, Saas.

### **Registration and login app:**

- Developed a responsive Register & Login App using react Functional components, React Hooks and used local-storage for storing user details. Added validation functionality too.

### **Ecommerce App:**

- Created responsive Ecommerce app using HTML and CSS only, UI of this project is so attractive.

## **Certifications**

Issued March 2023

**JavaScript**

*By HackerRank.*
